A rather familiar yet disturbing scope from [ITL](#) (Makers of the Mini N/SEAS).

Looks like a thermal PVS-7 - ??? The Coyote-7 (Not surprising that suffix)

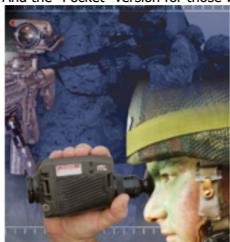

Or the "Monocular" Version. The Coyote.

The Weapon Sight Version - Coyote Weapon Sight.

And the "Pocket" version for those with big pockets - the Coyote Pocket Scope.

A day/night GPS augmented and directional scope allowing co-ordinates of the TARGET area to be determined just by looking at it... (Would be nice for directing artillery). The nCROS

ITL Night Weapons Sight.

And their well-known monocular (already popped up in this thread) The Mini N/SEAS

I hadn't seen that thermal one that looks like the PVS-7 before - Though I thought Flex posted some ITL models before, so maybe I missed it or the picture disappeared?

David

Oh, one last product.

I think it's a thermal target acquisition system with a range of 15 km and eyesafe laser... Or perhaps it's a freaking big water bottle and he's really thirsty and taking a HUGE gulp... I can't quite tell from the pic.

From IOR in Romania...

<http://www.ior.ro/Details/MVN-1x/>

<http://www.ior.ro/Details/OVN-1x/>

<http://www.ior.ro/Details/LON-4x/>

Thanks to Chas on the UK forum for posting the links over there...

Few more IOR stuff would be:
BVN-1 binocular goggles

LZN-1 night vision scope

LPS-M crew served weapon sight
